---

**Aim:**

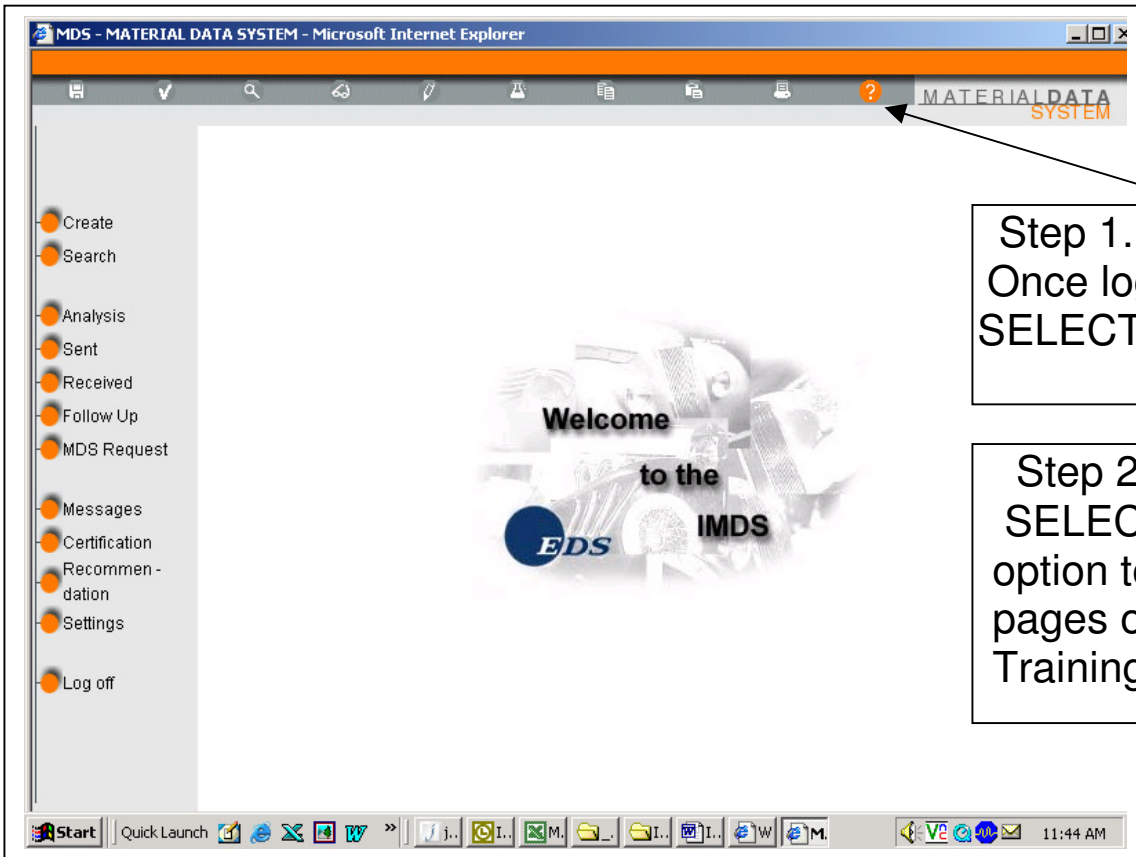

The aim of this document is to inform the users about the functionality of the International Material Data System (IMDS) and to show the related security concepts. Particularly, the underlying data protection of the Material Datasheet (MDS) and its confidential use are explained. Typical examples and processes are shown as well as the use of the various functions and features of the system. After reviewing the information contained here, the user should better understand the commands of the IMDS and be able to efficiently use them.

**For further questions not answered in this manual, please, have a look at the Public Pages of our Internet page:**

**[www.mdsystem.com](http://www.mdsystem.com)**

- **Under FAQs (Frequently Asked Questions) you might find answers to your specific problem, that is not explicitly mentioned here as the FAQ section is regularly up-dated.**
- **Under News you find information about changes in a new IMDS release.**
- **Under Training you can register for classroom training or online training.**
- **The technical requirements for using the IMDS are to be found under Public pages → System → System requirements.**

Step 1.  
Once logged-in,  
SELECT Help-option “?”

Step 2.  
SELECT User-Manual  
option to view all 82  
pages of Adobe  
Training manual

To register your company with the IMDS, go to WEB page [www.mdsystem.com](http://www.mdsystem.com)

Select option < Public IMDS Pages >, < System>, “On Line Registration”,  
Then at bottom-right hand corner of screen select button < Next >.

Begin entering your company information, your company’s manager,  
then the person who will be responsible for dealing with your customer-IMDS issues.

The IMD System will then e-mail you back a Long-In and a Password.
